

FIPASS HEALTH & SAFETY

NOTICE No 33

Atlink No.: ATLK-SN-033-V2

Issue Date: 16/02/25

FIPASS North West Barge – Mooring Bollards

To accommodate new mooring bollards being installed on the northwest barge, the Armco safety barriers have been removed from a significant proportion of the berth face on that barge. We have now removed a critical control measure to reduce the risk of individuals falling into the sea. The deck beyond the stanchions and chains, from the berth face to 2m away from the berth face, has now been designated as a lifejacket zone.

Any person accessing this area of deck on the northwest barge beyond the stanchions and chains **MUST** wear a life jacket within **one meter** of the dock edge for their own protection.

This Notice shall remain in force until further notice.
